## HOW TO CONNECT FRESH SCENTS DIFFUSER TO YOUR PHONE VIA APP:

- Go into your phone's App Store or Google Play Store. Search and download Aroma Link

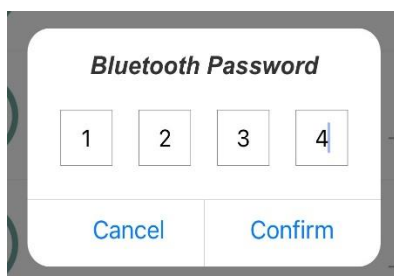

- Once the app is downloaded, make sure your Bluetooth is on.

- Open the Aroma Link App and press BLUETOOTH.

- Then click on your diffuser that is on the device list.
- Enter the Bluetooth password of the diffuser: 1234

- Now you will be able to control your scent diffuser from your phone.

## How To Manage Your Diffuser From Your Phone:

There are three action buttons on the screen: ON/OFF, SET and FAN.

### On/Off:

Click this button to turn on and off the diffuser

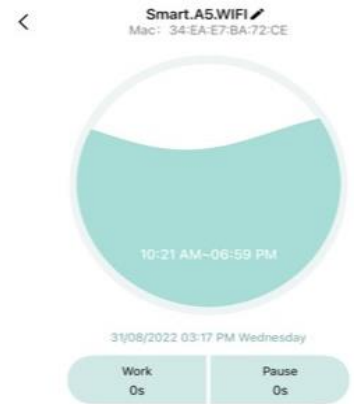

### Set:

This setting allows you to program start and stop times for each day individually or for multiple days. Working Time hours are in military time. Tap on the days you want and change the time intervals.

Whenever you make changes, remember to save before continuing.

When setting your frequency and working times, be sure to select all the days you want the diffuser to run on by tapping on them. If you do not do this, the days you did not select will be on the default Setting. Be sure to tap on all the days you want it to run, under "Cycle"

Additionally, you can also set diffusion schedules for both or one of your working times. This is accomplished by choosing work second (Measured in seconds) and the pause second (Measured in seconds.) This determines how often the scent is diffused within the times you previously programmed.

### Fan:

This feature turns the outer diffuser fan on and off. This is only needed if the diffuser is being used as a stand-alone diffuser. You do not need this on If it is being used with your HVAC.
